Signal Processing 18 (1989) 453–454
Elsevier Science Publishers B.V.

AUTHOR INDEX VOLUME 18

(The issue number is given in front of the page numbers)

Adar, Y., *see* **H. Messer** (4) 413–424

Basseville, M., Distance measures for signal processing and pattern recognition (4) 349–369
Berberidis, K., *see* **S. Theodoridis** (2) 153–167
Biglieri, E. and **K. Yao**, Some properties of SVD and their applicatjon to digital signal processing (3) 277–289
Bovik, A. C., *see* **L. Naaman** (2) 139–152

Cafforio, C., C. Prati and **F. Rocca**, Synthetic aperture radar focusing with polyphase filters (4) 397–411
Chao, J. and **S. Tsujii**, Estimation and synthesis of singular vector AR processes over components spaces (3) 313–326
Choi, W. Y. and **R.-H. Park**, Motion vector coding with conditional transmission (3) 259–267
Chou, K. C. and **A. S. Willsky**, A multi-resolution, probabilistic approach to 2-D inverse conductivity problems (3) 291–311

D'Haeyer, J. P. F., Gaussian filtering of images: A regularization approach (2) 169–181
Dellepiane, S., S. B. Serpico and **G. Vernazza**, A framework for processing and interpretation of 3-D signals from multislices (3) 239–258
Döhler, H.-U., Generation of root signals of 2-D median filters (3) 269–276

Fleisher, S. and **E. Shwedyk**, Performance of a sequential detector for multiple composite hypotheses (1) 43–54

Greiner, R., *see* **S. Lee** (4) 371–386

Isaksson, A. and **M. Millnert**, Inverse glottal filtering using a parameterized input model (4) 435–445

Janssen, A. J. E. M., Note on a linear system occurring in perfect reconstruction (1) 109–114

Kabal, P., *see* **R. P. Ramachandran** (3) 327–339
Kalouptsidis, N., *see* **S. Theodoridis** (2) 153–167
Kalveram, H. and **P. Meissner**, Itakura–Saito clustering and rate distortion functions for a composite source model of speech (2) 195–216
Ko, C. C., T. S. Quek and **W. Ser**, A simple fast algorithm for null steering adaptive arrays (1) 55–62
Kutka, R., A variable median filter for image restoration adaptable to different types of spike noise (2) 217–224

Lee, S., E. Milios, R. Greiner, J. Rossiter and **A. Venetsanopoulos**, On the machine analysis of radar signals for ice profiling (4) 371–386

Mecocci, A., Moving object recognition and classification in external environments (2) 183–194
Meissner, P., *see* **H. Kalveram** (2) 195–216
Mendel, J. M., Comments on "Optimal seismic deconvolution" (D. G. Lainotis, S. K. Katsikas and S. D. Likothanassis, Signal Processing, Vol. 15, No. 4, 1988, pp. 375–404) (4) 447–448
Messer, H. and **Y. Adar**, New lower bounds on frequency estimation of a multitone random signal in noise (4) 413–424
Milios, E., *see* **S. Lee** (4) 371–386
Millnert, M., *see* **A. Isaksson** (4) 435–445
Mitra, U., *see* **A. Nieminen** (1) 1–15
Moustakides, G. V., Correcting the instability due to finite precision of the fast Kalman identification algorithms (1) 33–42

Naaman, L. and **A. C. Bovik**, Least-squares order statistic filters with coefficient censoring (2) 139–152
Narasimhan, S. V., Pole-zero spectral modeling of EEG (1) 17–32
Neuvo, Y., *see* **A. Nieminen** (1) 1–15
Nieminen, A., Y. Neuvo, A. Värri and **U. Mitra**, Algorithms for real-time trend detection (1) 1–15

Park, R.-H., *see* **W. Y. Choi** (3) 259–267
Prati, C., *see* **C. Cafforio** (4) 397–411

Quek, T. S., *see* **C. C. Ko** (1) 55–62

Ramachandran, R. P. and **P. Kabal**, Minimax design of factorable Nyquist filters for data transmission systems (3) 327–339
Rocca, F., *see* **C. Cafforio** (4) 397–411
Rösel, P., Timing of some bit reversal algorithms (4) 425–433
Rossi, D. J., A. S. Willsky and **D. M. Spielman**, Object shape estimation from tomographic measurements – A performance analysis (1) 63–87
Rossiter, J., *see* **S. Lee** (4) 371–386
Rutkowski, L., Non-parametric learning algorithms in time-varying environments (2) 129–137

Seitz, P., The robust recognition of object primitives using local axes of symmetry (1) 89–108

Serpico, S. B., *see* **S. Dellepiane** (3) 238–258
Ser, W., *see* **C. C. Ko** (1) 55–62
Shwedyk, E., *see* **S. Fleisher** (1) 43–54
Sid-Ahmed, M. A. and **J. J. Soltis,** Processing of digital images using phase contrast filters realized as 2-D IIR filters (3) 231–237
Soltis, J. J., *see* **M. A. Sid-Ahmed** (3) 231–237
Spielman, D. M., *see* **D. J. Rossi** (1) 63–87

Tanik, Y., *see* **M. A. Tugay** (2) 117–127
Theodoridis, S., K. Berberidis and **N. Kalouptsidis,** A new adaptive covariance symmetric algorithm and a fast initialization scheme for least squares FIR filters with symmetric impulse response (2) 153–167
Tsujii, S., *see* **J. Chao** (3) 313–326
Tugay, M. A. and **Y. Tanik,** Properties of the momentum LMS algorithm (2) 117–127

Värri, A., *see* **A. Nieminen** (1) 1–15
Venetsanopoulos, A., *see* **S. Lee** (4) 371–386
Vernazza, G., *see* **S. Dellepiane** (3) 238–258

Walden, A. T., Accurate approximation of a 0th order discrete prolate spheroidal sequence for filtering and data tapering (3) 341–348
Willsky, A. S., *see* **D. J. Rossi** (1) 63–87
Willsky, A. S., *see* **K. C. Chou** (3) 291–311

Yao, K., *see* **E. Biglieri** (3) 277–289

Zhang, Q. T., An entropy-based receiver for the detection of random signals and its application to radar (4) 387–396
